

**ST. JOHN'S COLLEGE
UNIVERSITY OF OXFORD**

Junior Research Fellowships 2023

Junior Research Fellowships are fellowships for full-time research offered by Oxford colleges to early career researchers who are close to completion of a doctorate (and will have submitted their thesis no later than three months before their start date of this post), or who have recently been awarded a doctorate. They provide an unrivalled opportunity to establish a research profile as a member of a collegiate community.

St John's College Oxford propose, provided that suitable candidates present themselves, to elect up to four such Fellows, with effect from 1 October 2023 or as soon as possible thereafter.

The college proposes to elect up to two Fellows in the Arts, Humanities and Social Sciences and two in the Sciences from the list below. Interdisciplinary applications and applications in subjects not listed will be allocated at the discretion of the College. No subject is considered ineligible. Candidates must choose one subject.

Duties

The basic obligation of a Junior Research Fellow is to engage full-time in research and its dissemination in some branch of the Humanities, Sciences or Social Sciences. The successful candidate will be expected to propose, plan and manage a high-quality programme of original research; publicise the outcomes of that research through presentation of papers and publications; and engage in the life and activities of the College. Fellows may be asked to undertake a limited amount of teaching and on occasions asked to undertake work associated to the admissions process

Terms and Benefits

Junior Research Fellowships are fixed-term posts, tenable for three years. The start date of a Fellowship may, with the agreement of the college, be brought forward or delayed in exceptional cases, to accommodate personal circumstances; if so, the terminal date will be adjusted accordingly.

The Fellowships may be extended for a further year. The purpose of the extension is to enable the Fellow to get the full benefit of the opportunity, which the Fellowship offers to develop their early career by completing a research project, without embarking upon a medium-term or permanent appointment. Having taken account of the Fixed-term Employees (Prevention of Less Favourable Treatment) Regulations 2002, the college would not regard such an extension as entitling the Fellow to permanent employment on the following objective grounds:

- (a) It is the colleges' policy that Junior Research Fellowships should provide opportunities for academics at the beginning of their careers;
- (b) In order to achieve a turnover of appointments in a wide range of subjects so that this policy can continue into the future for a succession of academics at this stage of their careers, it is an essential feature of these Fellowships that they are limited in duration.

The annual salary is £36,386 per annum.

The salary will normally be adjusted if the Fellow is in receipt of other remuneration and may be subject to annual increase.

A Junior Research Fellow will pay rent for College accommodation and be liable for council tax and utilities. Partnered accommodation may also be available to rent (for details contact the relevant College). Successful applicants will normally be required to spend most of their time in Oxford during the tenure of the appointment.

Fellows are entitled to free lunches and dinners at High Table as available. Other allowances (including University fees) and facilities are offered at the discretion of the Governing Body. A Junior Research Fellow may be permitted to undertake teaching up to a maximum of six hours a week during full term. The understanding is that St John's will have first refusal of any teaching offered by a Junior Research Fellow.

The College offers parental leave provision comparable to the University's. Further details are available on request. St John's College has a purpose-built college nursery which provides places for children of College and University staff and students. Further information is available at <http://www.baintonroadnursery.co.uk/>

Selection Criteria

Candidates should:

- hold a doctorate, or be close to completion and will have submitted their thesis no later than three months before the start date of this post. Those who formally submitted their doctoral thesis for viva voce examination prior to 1 October 2021 are not eligible, unless they have had a career break (e.g. a period of parental leave, family commitments, illness or other circumstances), or there are exceptional circumstances. Students (such as medical students) whose doctorate interrupted their professional training, should have completed their professional training since 1 October 2021;
- have research expertise in their chosen field as demonstrated by a completed (or close to being completed) doctoral thesis and/or published or forthcoming books, or articles in refereed journals, as relevant to the candidate's field; or promise of such achievement, as relevant to the candidate's field;
- have the ability to present research findings effectively to fellow professionals at national and international conferences or in professional research seminars;
- have a coherent plan of research for the duration of the appointment which can either be the further development of the doctoral work or an entirely new area and which promises to make a valuable contribution to the candidate's field;
- have not already held a comparable career development appointment at Oxford or another university. A comparable appointment is deemed to be a salaried research-only appointment for the purposes of self-directed research.

Successful candidates will be expected to contribute fully to the life of the College.

How to Apply

Applicants are asked to indicate on their application form a single subject area, chosen from those in list below, which best matches the area of research they would

undertake should their application be successful. Applicants whose subjects might be thought to fall into more than one of the subject areas listed (e.g. Philosophy/Theology) are asked to indicate this fact in their application and are invited to draw the attention of the College authorities to factors which they consider relevant to the classification of their research project.

Applications will be accepted only if made according to the following instructions:

- Hard copy applications are not necessary and late applications will not be accepted.
- Candidates applying more than one year since submitting their doctoral thesis or since completing their professional training should bring to the College's attention any special factors to be considered.
- Candidates requiring laboratory or studio space must communicate with the relevant department at the time of application and will be required to submit a letter of support from the host department if they are called for interview.
- Applications should be submitted electronically to academic.vacancies@sjc.ox.ac.uk. Applications should be sent as a single PDF file. Applications written on a Mac MUST be 'exported as PDF' before submission. The equal opportunities monitoring form should be emailed as a separate PDF document.

The closing date for receipt of applications is noon on Friday 28th October 2022. Late applications will not be accepted.

References

Every candidate is asked to name two referees and to ask them to provide references using the instructions listed below. Hard copy references should NOT be sent. References should be received by the College by **noon on Friday 28th October 2022**

Candidates are responsible for requesting references from their referees and for ensuring that references arrive on time; they should therefore give referees enough time to write in their support. **The College will not request references directly from the referees.**

The College is grateful to referees for their assistance; they hope that they will understand the impracticability of acknowledging receipt of referees' letters.

Selection Process

Shortlisting, interviewing and appointing procedures will be conducted in early 2023.

St John's College is committed to equality of opportunity. It is the policy and practice of St John's that entry into employment and progression within employment will be determined only by criteria which are related to the duties of a particular post and the relevant salary scale. No applicant or member of staff will be treated less favourably than another because of their age, disability, ethnicity,

marital or civil partnership status, parental status, religion or belief, sex or sexual orientation.

Applications for this post are particularly welcome from candidates who are women, have a disability and those from black and minority ethnic backgrounds, who are under-represented in academic posts in Oxford.

The appointment will be subject to the provision of proof of the right to work in the UK.

If you require a visa, we have a dedicated Staff Immigration Team to support successful applicants through the immigration process (for Skilled Worker visas) from job offer through to arrival in the UK. This is subject to the eligibility criteria being met for the required visa route. In particular, that they have sufficient English language skills (evidenced by having passed a secure English Language Test at CEFR B1 or above, *or* coming from a majority English-speaking country, *or* having taken a degree taught in English).

They are also to be asked to note that the visa application process will require them to submit no later than three months prior to the start date of this post, either a copy of their doctoral award certificate, or an academic reference confirming that their doctorate has been awarded, or an academic reference confirming that they have submitted their thesis, if they have not yet completed.

Subject List: Applications and references should be submitted electronically to academic.vacancies@sjc.ox.ac.uk

Philosophy	Physics
Politics	Computer Science
Economics	Biochemistry
Classics (including Ancient History)	
Theology	

About St John's College

Established in 1555, St John's College fosters excellence in education and research. It is one of the largest among Oxford Colleges and nearly every subject studied at the University has its representation. Today, St John's is home to approximately 390 undergraduates, 250 graduate students, 100 fellows and 25 College lecturers. A vibrant international community, it fosters intellectual rigour, creativity, and independence in its students, teachers, and researchers. The College supports a range of research activities including discussions, seminars, workshops, public lectures and visiting scholar schemes, as well as the Research Centre, which particularly emphasizes interdisciplinary approaches. While scholarly publication is naturally at the heart of our research endeavours, the fellowship is also committed to informing policy and public debate, and to teaching that is informed by research findings. Further information about the College is available at <http://www.sjc.ox.ac.uk>
